

Traffic Violations “In the Right Lane”

There is a change that is both interesting but true
The numbers in the lane spaces must not exceed four plus two
Be diligent and observant to avoid violations and those red faces
Make certain that the defense occupies the first lane spaces
But before the ball becomes live this you must do
Allow the offense the option of occupying each lane space too
And before the ball is live and the shooter is set free
The defense may have first refusal to each lane space three
If an option is waved before the play is to begin
A member of the other team may jump right in
Before the ball is live the optional positions may be rearranged
But the maximums for each team must be unchanged
Check those lane spaces before the play has begun
Make certain that the defense is occupying each lane space one
If you follow these procedures that are implicitly clear
Then those lane violations might soon disappear

HAVE A FANTASTIC SEASON—*Ken R. Estabrooks*
